

Chop Saw Blades

For Use On Chop Saw

For quick and cool cutting on steels, stainless, and non-ferrous metals.

Features

- The double fiberglass reinforcement produces a sturdier foundation and a much longer life span than generic blades.
- Excellent on tough to cut materials like stainless steel.
- A proprietary abrasive formulation, and the highest amount of these particles in each blade, produce faster, more efficient and economical cutting.
- The blade produces less abrasive dust for a better operating environment.
- All wheels exceed intended RPM range, and all are built to eliminate vibration.

Overview

Rockmount Chop Saw Blades are built to cut cooler and last longer. The tightly woven double fiberglass mesh in this blade produces a stronger foundation that lasts longer, even on stainless steel. The extraordinary amount of the high-quality abrasives in this blade produce faster cuts with less abrasive dust. For general purpose cutting on steels, stainless steel and other metals.

Options

Available in 12" and 14" sizes.

Part #	Style	Size
9995	Chop Saw Blade	12" x 3/32"
9996	Chop Saw Blade	14" x 3/32"
