

Cut-Off Wheels

For Use On Angle Grinder

Our combination of a high thread count fiberglass mesh foundation and a superior abrasive particle formula produce a long lasting, cool running and fast cutting wheels.

Features

- Rockmount Cut-Off Wheels work faster and run cooler.
- Our abrasives are made using a proprietary carbide particle formula and the highest amount of these particles in the industry.
- We use the highest quality fiberglass mesh weave to form the foundation of the disc, creating a strong durable structure.
- Rockmount uses baked on labels for safety and to prevent clogging.
- All wheels exceed intended RPM range, and all are built to eliminate vibration.

Overview

Rockmount has two primary lines of abrasives, the green labeled general-purpose abrasives and the red labeled "Electra" line. The Electra Line takes a high-quality abrasive and adds additional performance through Cube Matrix technology. With this technology, the abrasive particulates fragment in thin sections producing a new sharp edge on each particle as they wear. This increases lifespan and performance.

Options

Cube Matrix Cut-Off Wheel (Red Label - Electra Line)

- Our highest performing wheels.
- Self-sharpening and long lasting.
- Rigid wheel for faster cutting.
- Excellent on all steels including stainless.
- Available in 4-1/2" and 6" sizes.
- Depressed center option for hard to reach areas.

Part #	Style	Size
90705	Cube Matrix Depressed Center Cut-Off Wheel	4-1/2" X .045" (7/8)
90710	Cube Matrix Cut-Off Wheel	4-1/2" X .045" (7/8)
90706	Cube Matrix Depressed Center Cut-Off Wheel	6" X .060" (7/8)

Cut-Off Wheels

For Use On Angle Grinder

Cut-Off Wheel (Green Label – All Purpose)

- High performing general purpose wheel.
- Make clean steady cuts with minimal burrs.
- Doesn't clog on softer metals.
- Excellent on aluminum, copper and bronze.
- Depressed center option for hard to reach areas.
- Available in 4-1/2" and 6" sizes.

Part #	Style	Size
9987	Cut-Off Wheel	4" X 3/32" (5/8)
9988	Cut-Off Wheel	4-1/2" X 1/16" (7/8)
9988DC	Depressed Center Cut-Off Wheel	4-1/2" X 1/16" (7/8)
9994	Cut-Off Wheel	6" X .040" (7/8)

Combo Cut-Off / Grind Wheel

- Designed to cut quickly, grind easily and finish work surfaces all with one wheel.
- Cost Effective as it eliminates regular wheel changes.
- Ideal for all steels including stainless.
- Available in 4-1/2" diameter, with threaded arbor.

Part #	Style	Size
9985	Combo Cut-Off/Grind Wheel	4-1/2" x 3/32" (5/8 threaded arbor)
