

Cut-Off Wheels

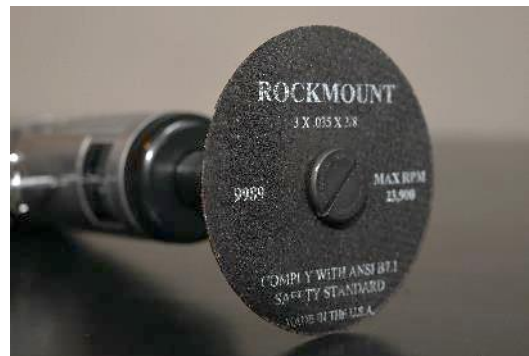

For use on High Speed Cutter

Features

- A tight fiberglass mesh weave foundation provides a longer life and safer operation than standard wheels.
- Proprietary abrasive particle formulation for cooler and faster cutting.
- Excellent on Steel and Stainless

Overview

The number of cuts each wheel will give you is always the ultimate gauge of the real cost of a Cut-Off wheel. Our wheels are built with the highest quality fiberglass mesh and with a much finer weave than standard wheels. It is that sturdy foundation, coupled with an innovative abrasive formulation, that allows our wheel to make more cuts while running cooler, cutting faster and lasting longer. Great for steels and stainless steel.

Options

Available in 3" and 4" diameter with different thickness. Works with all standard Cut-Off wheel mandrels.

Part #	Style	Size
9989	Cut-Off Wheel	3" x .035" (3/8)
9990	Cut-Off Wheel	3" x 1/6" (3/8)
9991	Cut-Off Wheel	4" x .035" (3/8)
9992	Cut-Off Wheel	4" x 1/16" (3/8)
