

Flap Discs

For Use On Angle Grinder

Features

- As aggressive as a grinding wheel and as delicate as polishing disc.
- Our flaps are made of a high-quality fabric and superior abrasive particle formula.
- They are long lasting and efficient for grinding, sanding and polishing. Remove rust, paint and other contaminants and grind on any metal including aluminum.

Options

Flap Disc

- Fast cutting and long lasting Zirconia abrasives.
- Operator pressure determines how aggressive or delicate a job this abrasive will do.
- No contaminants – rust and corrosion free results. Excellent on stainless.
- Available in 4", 4-1/2" and 7" diameters in multiple grits.

| Part # | Style | Size | Grit |
|--------|-----------|--------------|------|
| 9959 | Flap Disc | 4" (5/8) | 80G |
| 9976 | Flap Disc | 4-1/2" (7/8) | 40G |
| 9977 | Flap Disc | 4-1/2" (7/8) | 80G |
| 9978 | Flap Disc | 4-1/2" (7/8) | 120G |
| 9973 | Flap Disc | 7" (7/8) | 40G |

Trimmable Flap Disc

- Same quality construction as our flap disc with the added benefit of being trimmable.
- The plastic backing plate can be easily trimmed to expose more of the flap disc edge. This provides the ability to increase edge exposure on the wheel as needed for working into corners and tough to reach places.

| Part # | Style | Size | Grit |
|--------|---------------------|--------------|------|
| 9976T | Trimmable Flap Disc | 4-1/2" (7/8) | 40G |
| 9977T | Trimmable Flap Disc | 4-1/2" (7/8) | 80G |

Flap Discs

Options Continued...

Aluminum Flap Disc

- Non loading flap disc especially designed for use on aluminum. This disc resist clogging that is so common when working with aluminum.
- Aluminum oxide and silicon carbide formulation specifically designed for working on aluminum, copper, bronze and other soft metals.
- Non contaminating to the base metal.

| Part # | Style | Size | Grit |
|--------|--------------------|--------------|------|
| 9966 | Aluminum Flap Disc | 4-1/2" (7/8) | 40G |
| 9967 | Aluminum Flap Disc | 4-12" (7/8) | 80G |
| 9968 | Aluminum Flap Disc | 4-1/2" (7/8) | 120G |

High Density Flap Disc

- All the best features of our highest quality flap disc with an extra thick flap design.
- A great value – will typically outwear a regular flap wheels three to one.
- Flaps are angled so more of the flap surface contacts the base metal – Increases speed and efficiency.

| Part # | Style | Size | Grit |
|--------|------------------------|-----------------------------|------|
| 9976HD | High Density Flap Disc | 4-1/2" (7/8) | 40G |
| 9977HD | High Density Flap Disc | 4-1/2" (7/8) | 80G |
| 9978HD | High Density Flap Disc | 4-1/2" (7/8) | 120G |
| 9976WN | High Density Flap Disc | 4-1/2" (5/8 threaded arbor) | 40G |
| 9977WN | High Density Flap Disc | 4-1/2" (5/8 threaded arbor) | 60G |
| 9978WN | High Density Flap Disc | 4-1/2" (5/8 threaded arbor) | 80G |
| 9979WN | High Density Flap Disc | 4-1/2" (5/8 threaded arbor) | 120G |
