

# Grinding Wheels

## For Use On Angle Grinder

Designed to run cooler and last longer than ordinary grinding wheels.

### Features

- Rockmount grinding wheels are built to the highest standards with a high thread count fiberglass mesh foundation and a proprietary carbide formulation.
- Better balanced for longer wear and less chatter they commonly outlast ordinary abrasives 4 – 6 times and produce significantly less abrasive dust.

### Overview

Rockmount has two primary lines of abrasives, the green labeled general-purpose abrasives and the red labeled "Electra" line. The Electra Line takes a high-quality abrasive and adds additional performance through Cube Matrix technology. With this technology, the abrasive particulates fragment in thin sections producing a new sharp edge on each particle as they wear. This increases lifespan and performance.

### Options

#### Electra® Ultimate Grind Wheel (Red Label)

- Our highest performing grinding wheel.
- Cube Matrix Technology produces greater efficiency.
- Excellent on all steels including stainless.
- Lasts 4 – 6 times longer than average wheels.
- Available in 4-1/2" and 6" diameters.

Part #	Style	Size
9938	Electra Ultimate Grind Wheel	4 -1/2" X 1/4" (7/8)
9938WN	Electra Ultimate Grind Wheel	4 -1/2" X 1/4" (5/8 threaded arbor)
9899	Electra Ultimate Grind Wheel	6" X 1/4" (7/8)
9899WN	Electra Ultimate Grind Wheel	6" X 1/4" (5/8 threaded arbor)

# Grinding Wheels

For Use On Angle Grinder

## Green Label – All Purpose Grinding Wheel

- Our general purpose grinding wheel outlasts standard abrasives 2-3 times at competitive prices.
- High quality structure provides increased durability.
- Proprietary carbide formulation allows for fast grinding and long life.

Part #	Style	Size
9931	Grind Wheel	4" x 1/4" (5/8)
9926	Grind Wheel	4-1/2" x 1/4" (7/8)
9900	Grind Wheel	4-1/2" x 1/4" (5/8 threaded arbor)

## Aluminum Grind Wheel

- Specially designed for grinding aluminum.
- This wheel will grind without clogging and will not contaminate the base metal (a common issue with all purpose abrasives).

Part #	Style	Size
9926AL	Aluminum Metal Mover Wheel	4-1/2" X 1/4" (7/8)

## Combo Cut-Off / Grind Wheel

- Designed to cut quickly, grind easily and finish work surfaces all with one wheel.
- Cost effective as it eliminates regular wheel changes.
- Ideal for all steels including stainless.
- Available in 4-1/2" diameter, with threaded arbor.

Part #	Style	Size
9985	Combo Cut-Off / Grind Wheel	4-1/2" X 3/32" x 5/8-11
